

Powr-Flite®

HIGH-SPEED SMOOTH OPERATION

Pad-to-floor contact without
a compensating caster

Classic Burnisher

Item# C1600-3

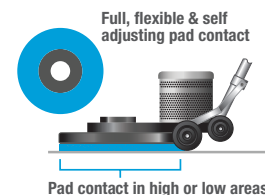

Item#
C1600-3

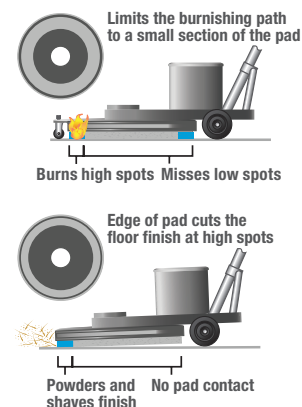

EXCEPTIONALLY SMOOTH OPERATION AND PRECISION BALANCED FOR COMPLETE PAD-TO-FLOOR CONTACT

- All-metal handle housing, tube and trigger assembly stand up to the rigors of the toughest jobs
- Proprietary pad driver provides full pad-to-floor contact conforming to low spots and rising up and over high areas
- Thumb-activated safety interlock prevents accidental start up which makes for a safer work environment
- Powerful 1.5 hp, 1600 RPM motor brings the shine out of the most worn floors
- Heavy, all-metal base is long lasting and durable

Powr-Flite Burnishers

Conventional Burnishers

TECHNOLOGICALLY ADVANCED

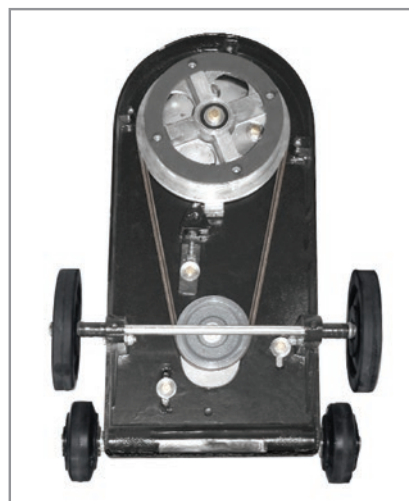

The Classic burnisher by Powr-Flite combines the traditional all metal burnisher housing with the most technologically advanced motors and electrical components, providing years of worry-free service. These machines offer exceptionally smooth operation with a flexible pad driver for consistent results on uneven surfaces. Unlike conventional burnishers, the Classic features precision-balanced weight distribution, providing complete pad-to-floor contact, eliminating the need for a compensating caster.

All-metal handle with safety interlock feature

Low-profile, all-metal housing with non-marking bumper

V-belt driven

Adjustable handle to allow for a more comfortable handle height
